

Gali PC

On-line dripper

Pressure-compensating button dripper

Crops • Berries • Tree irrigation • Greenhouse grown vegetables
Applications • Nurseries • Orchards • Greenhouses • Landscaping

Gali PC is an on On-line , compact, pressure-compensated dripper with an advanced self-flushing mechanism - designed for greenhouses, nurseries, and other protected crop applications. Ideal for growers seeking precise and uniform irrigation, even under challenging water conditions and high-frequency irrigation regimes.

Features & Benefits

- Compact multi-optional button dripper
- Primary peripheral labyrinth with wide water passages
- Wide range of working pressures for various topographies and crops
- A Thick, chemical resistant silicone diaphragm ensures accuracy and high-pressure regulating performance for a long lifetime
- Self-flushing pressure compensated labyrinth
- 100% of drippers are inspected on line by an AI quality assurance visual system

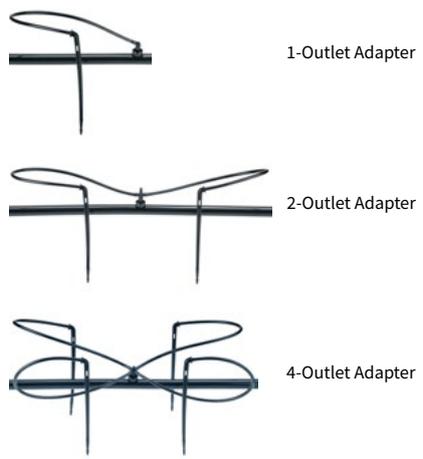

Specifications

- Suitable for 12-32mm pipes
- Unique and accurate regulating labyrinth mechanism
- Available flowrates: 1.0/2.0/4.0/8.0 L/hr
- Compatible with and approved by ISO9261 standard
- Accommodates 1,2,4 outlet adapters
